Creative, collaborative, and motivated by real-world impact.

I build practical web experiences with code, design, and research-driven problem solving. My work spans web development, AI exploration, student leadership, and hands-on projects that prioritize usability and clear communication.

Experience

President, Computer Science Club • Santa Ana College • 2023

Organized coding workshops, hosted guest sessions, and supported club operations and documentation.

Undergraduate Research Assistant • Cal State Fullerton • Summer 2022

Supported a machine learning research project with Python, dataset preparation, and experiment setup.

Education

B.S. in Computer Science • Cal Poly Pomona • Expected 2026

A.S. in Computer Science • Santa Ana College • 2024

Open to opportunities, collaborations, and new creative projects.

Skills

- Programming: Python, C, C++, SQL
- Web: HTML, CSS, JavaScript
- Tools: Excel, Word, PowerPoint
- Interests: AI, design, research, problem solving

Featured Projects

- Boston Dental Hub — polished UI concept for a professional dental brand experience.
- Pomodoro Timer — productivity app built with JavaScript, HTML, and Tailwind CSS.
- Untilted Therapy App — modern visual concept with responsive web design and storytelling.
